Private lessons: individual support and coaching

individual support

If a student needs support for a specific subject, we can offer qualified tutors. They support them efficiently with their individual needs. The aim of individual support is to help learners improve their performance in the relevant subject and achieve greater motivation and self-confidence. In order to achieve the most effective results possible, close interaction between individual support and classroom instruction is a great advantage. Our tutors are therefore in contact with the subject teachers who are teaching in the same building.

Once a quarter learners and parents receive a report from our tutors in which they define what has been achieved and, if necessary, what still needs to be achieved.

individual coaching

Individual coaching is for pupils who need support not mainly in a specific subject, but in their learning organization. It consists of methods of learning and self-management strategies in an interdisciplinary form. Pupils should acquire the ability to organize their learning independently and successfully as quickly as possible.

general conditions

Private lessons take place at agreed times at the Freies Gymnasium. The programme is for everyone. For pupils of the pre-classes, private lessons are only suggested in exceptional cases and after consultation with the class teacher.

Both individual support and individual coaching should - whenever possible - be time-limited and should not take place permanently parallel to regular subject instructions. With this in mind, we offer our students a trimestral assessment of their current situation, in which the further course of action is determined.
